DIAMOND MESH GATE

A diamond mesh gate is made from a frame consisting of round tube and is covered with diamond-shaped mesh. It is available in single or double leaf; and medium or heavy frame sizes. Medium size diamond mesh gates use 38mm x 2mm tubing for the gate frame, and heavy size gates use 42mm x 2mm. The gates can be used on farms between camps, as well as for residential fencing.

Single leaf – medium sizes available:

Height (mm)	900	1200	1800	2000	2400	3000
Length (mm)		750	750	750		
		900	900		900	
		1050				
		1200	1200			
		1500	1500			
	1800	1800	1800			1800
			2400			
			2500			
			2700			
			2800			
			3000		3000	
			3200			
		3600	3600			
			4000		4200	
		4200	4200			
			4300			
			4800			
			5000			
			6000			

Single leaf – heavy sizes available:

Height (mm)	1200	1800	2400
Length (mm)	900	900	
		1800	
			2500
		3000	3000
		3600	3600
			4000
		4200	

Double leaf – medium sizes available

Height (mm)	1200	1800	2200	2400	3000
Length (mm)		2400			
					2850
	3000	3000		3000	
	3600	3600		3600	
		4000		4000	
		4050			
	4200	4200		4200	
				4500	
		4800			
		5000
