KINGCLIP POLY CLOSURE

A Kingclip poly closure is a profile-matched, closed-cell polyethylene foam filler designed to seal the gaps beneath Kingclip roof sheeting at the ridge and eaves. It provides a snug fit to the roof profile, helping to prevent the entry of water, dust, insects and birds while improving the roof's weather resistance and insulation performance.

Key Features:

- Manufactured from durable closed-cell polyethylene foam.
- Profiled to suit Kingclip roofing sheets for a precise fit.
- Waterproof, weatherproof and UV resistant.
- Helps prevent the ingress of dust, moisture, insects and birds.
- Easy to install at roof ridges and eaves.
- Flexible, resilient and long-lasting.
- Assists with improving roof cavity insulation and weather sealing.

Applications:

- Kingclip concealed-fix roof sheeting systems.
- Roof ridge sealing.
- Roof eave sealing.
- Commercial, industrial and residential roofing applications.
- New roof installations and roof maintenance projects.
