MACSTEEL®

Data Sheet

GALVANISED SHEET

A galvanised sheet is a cold rolled base sheet that has been covered with a zinc coating. The sheet is then hot dipped galvanised.

Product Application

Galvanised sheets are used for applications that require strength, combined with workability for moderate bending and forming. This typically includes cladding, roll forming and roofing.

Mass per sheet (kg)

Dimensions	0.5mm	0.58mm	0.8mm	1mm	1.2mm	1.6mm	1.9mm	2.4mm	2.8mm	3mm
